

## Pittsburgh Region Residential EV Charging Station Installer Resource List

The residential electrical contractors listed below have indicated an interest and experience in installing electric vehicle (EV) Level 2 (240V) charging equipment in homes in the Pittsburgh region. The installation of residential EV Level 2 charging equipment may require an electrical service upgrade so be sure to work with a licensed electrician and your local utility, as needed, to understand local permitting requirements.

Please reach out to the companies listed below for consultation on your EV charging equipment installation or consult your charging station provider for electrical contractor recommendations. For more information, check out the U.S. Department of Energy's [Plug-In Electric Vehicle Handbook for Electrical Contractors](#).

**Disclaimer: The inclusion of companies on this list does not imply endorsement or support by Pittsburgh Region Clean Cities. Please note that interested parties are responsible for independently vetting and verifying the capabilities of the listed companies. If your company is interested in being included on the Residential Installer Resource List please email [coordinator@pgh-cleancities.org](mailto:coordinator@pgh-cleancities.org) with company name, contact name, a brief description of your capabilities, phone number, contact email, and website.**
